ECE 4564: Network Application Design
Assignment 1

Application Name: Lokator

Wireshark Explanation:

The Wireshark screenshot bellows shows the communication via HTTP between Lokator and the web page it requests data from. The URL is shown below where a HTTP GET query is made and the response received is also shown below. The response is consisted of several packets and the user-agent is the Apache HttpClient. More information can be found by opening up the actual .pcap file using Wireshark.
